

DIGITAL MICROPHONE CABLES FOR SOUND DEVICES 788T

Our XLR-3F to DE-15 digital cables are used to input digital microphones like the Schoeps SuperCMIT 2U into a Sound Devices 788T. The 788T encompasses the necessary features needed to use a digital microphone like the Schoeps SuperCMIT in the field.

The digital input section of the Sound Devices 788T is located on the rear of the recorder via a DE-15 Multi-function connector. Our digital AES/EBU cables use premium components such as Mogami W3080 110 ohm AES/EBU cable and Neutrik XX Series connectors with gold pins.

CT-DE15/1

Specifications

Length: 30"

Connectors: Neutrik® XX Series 3-pin XLR-F to DE-15

Cable: Mogami® W3080 110 ohm Digital AES/EBU cable, 5mm diameter with ultra-flexible PVC jacket

Compatible with

Sound Devices 788T DE-15, 15-pin Multi-function connector on back of unit.

Input Channels: Wired for Input channels 1,2 on 788T

To input of a single AES-42 digital microphone such as a Schoeps SuperCMIT 2U into Sound Devices 788T. Can also be used for input of any AES/EBU digital audio signal into a 788T.

Note: With a Schoeps SuperCMIT 2U the DSP-derived signal will go to channel one and the unprocessed shotgun signal will go to channel 2.

CT-DE15/2

Specifications

Length: 2 x 30"

Connectors: Neutrik® XX Series 3-pin XLR-F to DE-15

Cable: Mogami® W3080 110 ohm Digital AES/EBU cable, 5mm diameter

Compatible with

Sound Devices 788T DE-15, 15-pin Multi-function connector on back of unit.

Input Channels: Wired for Input channels 1,2 & 3,4 on 788T

CH 1,2 = Yellow
CH 3,4 = Red

To input of a pair of AES-42 digital microphones such as the Schoeps SuperCMIT 2U or CMD 2U into Sound Devices 788T. Can also be used for input of any AES/EBU digital audio signal into a 788T.
